Professional Summary

Mobile technical lead with 8+ years shipping Android and iOS apps across fintech and enterprise. I lead Interbank's currency-exchange platform, serving 100,000+ active users and generating US\$5M in annual profit. I specialize in secure, high-performance mobile architecture on Azure, with a focus on security (MTLS, AES-256 encryption) and CI/CD. I put AI at the core of how I build: I agentized my team's workflow with Claude —sustaining output with half the developers— and I ship my own products end-to-end by orchestrating agent fleets with Claude Code, from idea to deployment.

Work Experience

09/2024–**Interbank, Full-Time**, Lima, Peru

Present **Technical Lead — Money Exchange, 01/2025–Present**

- Lead the product that generates US\$5M in annual profit and serves 100,000+ active users, owning its availability and performance.
- Contributed to the definition of the intelligent exchange engine and managed its implementation, now consumed by other bank channels, including Interbank App and SIP (Financiera OH).
- Sustained delivery output with half the team (from 4 to 2 developers) by accelerating development through agentization with Claude.
- Supported ethical-hacking reviews of the application and led the remediation of the findings.
- Automated MTLS certificate encryption and rotation, with their passwords, in Python on every deployment and during emergencies.
- Hardened the apps with DexGuard (Android) and IxGuard (iOS) and implemented runtime download of sensitive variables.
- Raised test coverage above 70% and enforce it as a release gate.
- Shortened the feature delivery cycle to 1 week through GitFlow and parallelized team workflows.
- Interview candidates and help hire new developers for the team.

Senior Software Engineer — Money Exchange, 09/2024–11/2024

- Migrated the admin-platform microservice to Java 17 and updated libraries flagged as vulnerable by XRAY.
- Implemented MTLS certificates and SSL pinning on Android and iOS, and integrated visual changes across both platforms.
- Built the CI/CD pipeline for the Angular admin platform and managed the Kubernetes clusters of lower environments.

2025–Present **AI-First Product Builder, Personal projects**, Independent, Lima, Peru

- Build complete products from scratch by orchestrating AI agent fleets (Claude Code + Paperclip): design, development, QA and deployment under supervised autonomy.
- Automate operations with GitHub Actions and autonomous monitoring loops that watch builds, deployments and agent work.
- Shipped two products to production (Finchi and Mil Matos Studio — see Personal Projects) with S/ 0 marketing spend using AI-generated content.

- 12/2021– **Senior Android Developer**, *PedidosYa*, Full-Time, Lima, Peru
 08/2024
 - Built the app's wallet product, lifting user retention by 20%.
 - Built the card-acquisition flow, improving conversion by 15%.
 - Led the migration of the search flow to native, cutting load times by 30%.
 - Created reusable components that reduced development time by 25%.
 - Implemented UI Tests and Snapshot Tests, raising test coverage to 80%.
 - Integrated accessibility (VoiceOver) in the flash-deals module, meeting inclusive standards.
 - Applied the "Dynamic Builder" pattern to build interfaces and took part in the Android knowledge guilds.
- 03/2022– **Mobile Programming Professor**, *Tecsup*, Part-Time, Lima, Peru
 12/2024
 - Designed and updated beginner, intermediate and advanced course content aligned to the Peruvian market.
 - Taught lectures and labs, reviewed student code, and advised final projects to ensure technical quality.
- 08/2020– **Interbank**, *Full-Time*, Lima, Peru
 12/2021 **Tech Lead — Crédito por Convenio, 06/2021–12/2021**
 - Increased weekly deliveries by 50% by implementing CI/CD with Azure DevOps.
 - Integrated automated functional tests for Ruleta Millonaria, reducing defects by 20%.
 - Improved team collaboration with GitFlow and code maintainability with SOLID principles.**Senior Software Engineer — Money Exchange, Ruleta Millonaria, CTS Digital, 08/2020–05/2021**
 - Sped up deployments by 40% by implementing CI/CD with Azure DevOps.
 - Built features for Ruleta Millonaria, reaching 50,000 users, and integrated Azure OAuth 2.0 across multiple products.
 - Integrated Azure resources (Redis, Cosmos, Storage, Service Bus, ACR, Key Vault) and migrated the Crédito por Convenio admin platform to Angular.
- 04/2020– **Senior Android Developer**, *Solera*, Full-Time, Lima, Peru
 08/2020
 - Integrated the Cisco Webex SDK for online consultations, enabling telemedicine in the app.
 - Implemented the registration flow, improving user onboarding.
- 04/2019– **Senior Mobile Developer**, *Everis (NTT DATA)*, Full-Time, Lima, Peru
 04/2020
 - Built Spring Boot services and an Angular web admin to import/export files.
 - Implemented unit and instrumented tests integrated with Firebase Test Lab, plus interaction metrics that improved UX by 10%.
- 11/2018– **iOS Developer**, *Guvery SAC / Freelance*, Freelance, Lima, Peru
 07/2019
 - Designed and built an iOS digital-payments app using QR codes, integrating wallets such as Yape and Tunki.
 - Built Node.js services, iOS interfaces from Adobe XD mockups, and a real-time socket chat; ensured quality with SonarQube.

Personal Projects

- 2026 **Finchi**, *Personal-finance app*, Flutter
 Bank-statement scanning with OCR (Gemini API), local-first architecture, and gamification with a mascot and XP challenges. Built end-to-end with a fleet of Claude Code agents: from product design to release.
- 2026 **Mil Matos Studio**, *Online booking platform*, Next.js + Firebase
 Appointment system for the family beauty salon with passwordless (magic-link) authentication. Continuous deployment with GitHub Actions and an AI-generated marketing strategy at \$/ 0 cost.

Education

- 2016–2018 **Technical Degree in Software Design and Development**, *TECSUP*, Lima, Peru
 Top academic third.
- 02/2019– **Student Exchange**, *Universidad Complutense de Madrid*, Madrid, Spain
 03/2019 Participation in a technology fair.

Technical Skills

- Languages Kotlin, Swift, Java, JavaScript, Python
 Mobile Android SDK, Jetpack Compose, SwiftUI, Clean Architecture

Web & Backend	Angular, Node.js, Spring Boot
AI & Agents	Claude Code (subagent fleets, autonomous loops), Paperclip (multi-agent orchestration), MCP, Gemini API (OCR), prompt engineering
Cloud & DevOps	Azure (Redis, Cosmos, DevOps, Key Vault), GitHub Actions, Docker, Kubernetes, CI/CD
Security	MTLS, SSL Pinning, AES-256, JWT, Asymmetric Encryption, DexGuard, IxGuard
Testing	UI Tests, Snapshot Tests, Firebase Test Lab
Methodologies	SCRUM, GitFlow, SOLID, CI/CD

Soft Skills

Technical leadership, teaching, teamwork, communication, resilience.

Languages

Spanish	Native
English	Professional (in progress, ICPNA · British)

Certifications & Courses

Azure DevOps Specialization (Tym Cloud, 2020) · Android Architecture, Android Design Patterns, Apple Full-Stack and Angular (Platzi, 2020).
